

Beyond the Elevator Pitch: Inside Start-up Stories

asked by **DCZ**  **HeadhunterAngels**

**”From weak defenses to
ultimate warriors:
Trained T cells.**

*Andreas Regnery,
CEO of Belyntic*

Spotlight on

ANDREAS REGNERY

Co-Founder &
Managing Director

1. What key issue does your company tackle, and what impact will it have on the world?

” Imagine a world where your **immune system** is your **fortress**, protecting you from every threat that comes your way.

But what if your defenses are WEAK?

That's where we step in. Our revolutionary immunotherapies empower the body's own **T cells** to become the **ultimate warriors**, fighting off viruses, bacteria, and even cancer.

2. What special skills or innovations make your company stand out?

” For many years, we've delved deep into the world of **pharmaceutical peptides**, exploring their possibilities and limitations. Our journey led us to develop a game-changing platform: **PRECISION IMMUNOTHERAPY.**

Our AI-driven platform **predicts which pathogen parts** are presented to the immune system, while our proprietary molecular structure ensures **sustained immune activation.**

It's the future of treatment:

TARGETED, EFFECTIVE, and BUILT TO LAST.

3. What inspired you to found this company?

” **Peptides** play a crucial role in numerous physiological processes in our bodies and hold significant potential as pharmaceutical agents. However, the **challenges in their delivery and manufacturing** motivated Oliver and me to establish our company.

This situation mirrors the journey of **mRNA therapeutics**: despite their long-recognized potential, **efficient delivery and manufacturability** are essential for their commercial success.

4. What makes your company attractive to investors?

*Andreas Regnery & Oliver Reimann;
Managing Directors and Co-Founders*

” We possess a **unique technology** with **extensive pharmaceutical potential** and **commercial opportunities**. Our history of developing, commercializing, and strategically selling life sciences tech demonstrates our **swift execution** and **investor focus**. Plus, our **extensive manufacturing expertise** significantly advances drug development, often overlooked but crucial.

5. Why is your company a great place to work and attract top talent?

”  Our company is committed to **revolutionizing human health** through **groundbreaking research and development** in **critical medical areas**.

 Despite our small size and early stage, each team member plays a crucial role in advancing our mission, creating a **profound sense of purpose and fulfillment**.

 We empower our team with the freedom to harness their **unique talents**.

Additionally, the company's long-term prosperity will be a **collective achievement** and a **personal success story** for each team member, benefiting their growth, advancement, and financial well-being.

6. What advice would you give your past self at the start of your startup journey?

” From my time in **management consulting**, I learned that **smaller companies** often prioritize **daily operations over strategic thinking**. Founding a startup highlighted the challenge of staying strategic amidst daily demands.

Looking back, I see the importance of **stepping back** to explore **less obvious strategic opportunities**.

7. Can you share a fun fact or running gag in your team?

” As a team, we have shared numerous amusing **anecdotes** and memorable **quotes** throughout the years.

A longstanding tradition within our team, spanning both current and past members in our WhatsApp group, is the '**Where am I?**' segment.

Starting with business-related images, this segment now includes a diverse array of **beautiful, humorous, and unexpected encounters, vacation snapshots, and brain teasers.**

In a Nutshell

 Location: **Berlin, Germany**

 Foundation: **2018/ 2022**
